1. Goal

Through this sprint we aim to implement chat function with file upload option and possibly the notifications feature in backend. We further aim to prioritise the integration of backend and frontend. We would further aim to implement notification, profiles, admin pages, and make some code corrections in frontend.

We will also aim at building and deploying the app.

2. Duration of the sprint

2 weeks

3. What is the team's vision for this sprint?

Through this sprint we aim to have an integrated and function app with features like login, sign-up, booking, chat, etc. We further aim to achieve this though better team-work, communication, management and taking task initiatives.

4. Estimation in story points

For frontend and backend notifications it will be 11 story points. For all the user profiles it will be 3 story points. For backend chat feature implementation it will be 6 story points and then the total number of story points should be 20 approx.
